

**The only Australian company capable of producing Vanadium and HPA with a Government Environmental Authority and Mining Leases Approved**

## Mechanical Tradesperson

- Construction and operations of a mine, concentrator and two refineries
- Career growth in Australia's leading critical minerals Vanadium and HPA proponent
- Julia Creek residential role
- Full time
- Competitive Salary
- Professional development opportunities
- Help us stay years ahead and move further ahead in this new growing industry!

### About Us

Multicom Resources Pty Ltd is the only Australian company capable of producing Vanadium and HPA with Government Environment Authority and Mining Leases Approved. We are developing the Saint Elmo Project which will involve the construction of a mine, concentrator and two refineries on site 15km east of Julia Creek. The refineries will produce the critical minerals of Vanadium and High Purity Alumina.

Our goal is for all fulltime operations personnel to live local in the Julia Creek region.

We offer more than a job, we provide growth, development and a long term future in Australia's most exciting critical minerals refining operation.

### The Opportunity

We are currently seeking a skilled and experienced Mechanical Tradesperson to join our dynamic construction and maintenance team. This is an excellent opportunity for individuals with a strong mechanical background to contribute to the reliability and efficiency of our fixed plant equipment.

### Desired Skills Required:

The successful applicant must have the ability to adapt to various work environments, work well in a team and have a positive outlook and willingness to assist other departments not really related to their primary role. You will be fit, healthy and able to pass a medical exam prior to commencement. You will possess a minimum of Certificate 3 in Engineering – Mechanical Trade, Dual Trade would be Highly Regarded (Fabrication).

### Key Responsibilities will include:

As a Mechanical Tradesperson, you will be responsible for the inspection, maintenance, and repair of our machinery and process plant equipment.

Key responsibilities include:

- Perform routine preventive maintenance to ensure optimal functionality of equipment.
- Diagnose and troubleshoot mechanical, process pumping, piping and valving, hydraulic, and pneumatic issues.
- Execute timely and effective repairs to minimise downtime and maintain production targets.
- Conduct regular inspections to identify potential issues and recommend corrective actions.
